

McMurdo Sets New Aviation Industry Standard with 10-Year Warranty on Kannad Integra Emergency Locator Transmitters

Extended warranty period reinforces McMurdo's Kannad Integra as the world's most innovative, cost-effective and reliable aviation ELT distress beacon

AERO Friedrichshafen, Germany, Booth A5-101 – 20 April 2016 – McMurdo, the most

trusted name in emergency readiness and response, today announced a new 10-year standard warranty on its Kannad Integra Emergency Locator Transmitters (ELTs). The new warranty period, which replaces the previous 2-year warranty, is a major reliability milestone in the aviation industry and helps airlines and aircraft manufacturers optimize and control costs long-term.

“The 10-year warranty we are announcing today demonstrates McMurdo’s confidence in the quality of our products and sets a new standard in the aviation industry. It reinforces Kannad Integra as the world’s most innovative and most reliable ELT,” said Remi Julien, McMurdo President. “Aviation customers around the globe, whether commercial aircraft manufacturers, helicopter operators, airlines, or general aviation pilots, can trust McMurdo to continually build and deliver solutions that will help make the skies safer, more cost-effective and more reliable today and in the years to come.”

Traditional ELTs rely on an aircraft’s external antenna and GPS equipment, which is subject to failure in the event of an emergency. The Kannad Integra ELT, however, through its built-in internal antenna and embedded GPS receiver, can operate independently of the aircraft to provide key positioning data for better location accuracy and a higher chance of rescue.

Notes:

1. The new 10-year warranty will apply to all Kannad Integra ELTs purchased through McMurdo authorized suppliers including retailers, dealers and distributors, on or after April 20, 2016. ELTs purchased before this date, but within the last two years, will have their warranty extended for additional 2 years. To qualify for the 10-year or 2-year additional warranty, owners must register their Integra ELTs and agree to the terms and conditions on <http://www.mcmurdogroup.com/kannad-integra-elt-warranty-registration/>.
2. Nearly 60,000 McMurdo ELTs are used in over 100 aircraft and 150 airlines today making it one of the largest providers of aviation beacons in the world. McMurdo recently announced several Kannad Integra installations on Embraer's EJets 2, on [Southwest Airlines' Boeing 737 fleet](#) and on Chinese aircraft manufacturer [AVIC's AC312 helicopters and Y12 aircraft](#).
3. McMurdo was recently chosen by the European Commission to lead the development of next-generation aviation ELTs under the Horizon 2020 Research and Innovation Program's 3-year €3.5M [HELIOS project](#). As project coordinator, McMurdo will lead a consortium of well-established, proven European companies and industry experts including Airbus, Air France, France's government space agency CNES, Cobham Aerospace Communications and other companies with expertise in aircraft manufacturing, protective clothing design, aerospace and satellite communications, distress beacon development and search and rescue operations.
4. McMurdo is also actively involved in the definition and development of the emerging Global Aeronautical Distress and Safety System (GADSS) initiative led by the International Civil Aviation Organization to further improve airline safety.

About McMurdo

McMurdo is a global leader in emergency readiness and response including search and rescue and maritime domain awareness solutions. At the core of these solutions are resilient positioning, navigation and tracking products, technologies and applications that have helped to save 40,000 lives since 1982. A division of Orolia, McMurdo brings together nearly 150 combined years of experience by consolidating proven Boatracs, Kannad, McMurdo, SARBE and Techno-Sciences, Inc. brands into the industry's first end-to-end emergency readiness and response ecosystem (distress beacons, satellite connectivity infrastructure, monitoring/positioning software and emergency response management solutions). Airbus, Boeing, the British Royal Navy, the U.S. Coast Guard, NASA and others are among the hundreds of aviation, fishing, and government, marine and military customers around the world that trust McMurdo to prevent emergencies, protect assets and save lives. Established in January 2014, McMurdo has offices in France (Guidel and Sophia Antipolis), the UK (Portsmouth) and the U.S. (San Diego and Washington DC).
