

Orolia Attends Reagan National Defense Forum

Prestigious Event Includes Defense Officials, Congressional Members, Media and Top-Industry Leaders

Simi Valley, CA – December 5, 2017 – Orolia, the global leader in Resilient Positioning, Navigation and Timing (PNT) solutions, attended the 5th Annual Reagan National Defense Forum along with the top leadership from the U.S. Defense establishment.

Pentagon leadership, Members of Congress and senior staff, the Joint Chiefs of Staff, Service Secretaries, think tank scholars, diplomats from allied nations, media and the top leaders from the defense industry all convened at the Ronald Reagan Presidential Library to discuss and exchange views on a wide range of topics related to U.S. National Security. Orolia's participation provided it with an opportunity to hear from our nation's defense leaders and further understand where Orolia's technologies could address some of our most pressing national security issues, such as GPS/network reliability and soldier survivability.

"It was an honor to attend this event that addresses the state of our national defense and threats to our national security. As a Colonel for the United States Marine Corps, I understand first-hand the role mission-critical systems play in keeping our personnel safe and enabling successful operations. Orolia is focused on ensuring that our armed forces maintain situational awareness to meet and defeat any challenge today, and in the future."

Mark Cianciolo, Vice President of Americas for Orolia
