## Orolia Selected as a Finalist for Technology Innovation Awards

*Emergency Response Management System Delivers Technology Leap for Mission Capabilities*

Orolia, the global leader in Resilient Positioning, Navigation and Timing (PNT) solutions, is pleased to announce that the company has been selected as a finalist for Washington Technology's Technology Industry Innovators Awards Program.

This program recognizes leading companies in the government contracting sector that are evolving and making strategic changes to grow their business and better serve customers. Among other innovations, Orolia has acquired and successfully integrated 10 technology companies in the last 10 years, strategically building a portfolio of Resilient PNT products and services to meet the needs of government and commercial customers globally.

For example, Orolia acquired Washington, DC-based TechnoSciences Inc., a provider of search and rescue satellite aided technology (SARSAT) ground infrastructure. This

Government

capability was the missing link in an ecosystem of SARSAT solutions for McMurdo, an Orolia brand. McMurdo is now the only provider of end-to-end SARSAT solutions, from emergency distress beacons to ground signal processing stations to command and control systems. The company has installed more than half of the world's SARSAT ground infrastructure.

Orolia has been recognized in a special report on Washington Technology's website, available at [here](#). Winners will be announced in four categories of transformation: Acquisitions, Restructuring, Internal R&D and Technology Alliances, and Strategic Hires at the Government Computer News dig IT Awards Gala on Oct. 19.

## For Editors:

### About Orolia

*Orolia is the world leader in Resilient PNT solutions that improve the reliability, performance and safety of customers' critical, remote or high-risk operations. With locations in more than 100 countries worldwide, Orolia provides virtually fail-safe GPS/GNSS and PNT products and solutions for their customers' most mission critical needs..*
