

Orolia Maritime's New Solutions

BroadShield Lite: Protecting Critical Bridge Navigation with Resilient PNT

Orolia Maritime's Navigation Protection Solution allows vessels to protect and augment their core navigation systems from errors and malicious attacks. Orolia's system can detect anomalies in GNSS and offer alternative secure navigation signals until GNSS has been restored.

Upgraded PLB Range: Offering Accelerated Detection with additional GNSS capabilities.

Orolia's McMurdo FastFind 220 & Kannad Solo PLBs have been upgraded making the 220 & Solo the world's first PLBs utilising Galileo, allowing accelerated location detection as the PLBs receive coordinates from the new precision satellite network in addition to the tried and tested GPS network.

Seawise: Vessel Optimisation Analytics Tool

The Seawise Gateway and Cloud SaaS platform tool leverages existing VDR electronics infrastructure and onboard sensor information network, allowing shoreside data access and analytics for greater vessel optimisation insight.

Launch of the new AIS SART Range

Complementing Orolia Maritime's global leadership in localised rescue technology, the new McMurdo SmartFind S5A AIS & Kannad SafeLink AIS SARTs offer a range of functional and economic benefits over traditional radar SARTs.

Omnicom Global: Fleet Management Solution Offering Global Communications, Tracking and Reporting

The next generation of McMurdo Fleet Management offers; always connected, secure, easy to use communications beacon and PRISMA software to support operational efficiencies in fleet tracking, reports and communications.

New Analogue Microphone & Hub compatible with Netwave NW 6000 VDR

New versatile easy retrofit range of microphones include Power over Ethernet (PoE), self-test and multi-unit hub, supporting the Netwave brand of VDR solutions.

Trusted for Innovation, Trusted for Safer Journeys
